```

Executive Macro Insights & Portfolio Trajectory

1. **Portfolio Monoculture Risk**: **Music Separation iOS** accounts for **99.7% of MAU** ($4,639 / 4,653$) and **89.88% of 30-day gross revenue** ($79.85 / 88.84). **Vocal Cleaner** is virtually a dormant "zombie app" generating $0.00 in the past 21 days with 0 DAU yesterday.
2. **Geographic & Localization Concentration**: **87.2% of active users** in Music Separation iOS originate from **Japan** ($578 / 663$ DAU), followed by South Korea (4.5%). Revenue is similarly dominated by JPY and KRW localized SKUs. Growth strategy must lean heavily into East Asian app store optimization (ASO) while replicating this playbook in Western markets.
3. **Release Instability & Telemetry Noise**: The rollout of version `1.3.10` on *Music Separation iOS* drove a massive traffic surge (DAU increased from 233 on Sep 15 to 663 on Sep 16), but engagement rate plummeted from **80.5% down to 22.3%**. Concurrently, client-side UI telemetry suffers from severe **un-debounced slider event flooding** (`player_pitch_changed` and

`player_tempo_changed` generate up to 356 events/user), artificially inflating GA4 event volume and cloud logging costs.

---

2. Dedicated Deep-Dive: Music Separation iOS

App Header & Health Score

```
================================================================================ APP NAME: Music Separation iOS
BUNDLE ID: com.neuralsound.mss | GA4 PROPERTY ID: 533563138 | STREAM ID: 14402502632 DATA SCOPE: Production Only
(Internal Bangladesh Testers Excluded)
================================================================================ HEALTH SCORE: 7.8 / 10
================================================================================
```

Health Score Rationale:

- **Strengths (+4.5)**: 100% crash-free rate across all active releases; strong organic top-of-funnel acquisition in Japan/Korea; solid core feature execution (high audio session starts relative to session count).
- **Weaknesses (-2.2)**: Dramatic 1-day engagement collapse on latest build `1.3.10` (22.3% vs 80.5% baseline); catastrophic lack of event debouncing on player sliders; low monetized user conversion (~0.28% 30-day conversion rate relative to MAU); zero usage of non-recurring consumable minute packs.

■ In-App Purchases, Subscriptions & Consumable Minutes Breakdown

Product Sales Summary Table (30-Day Window)

Item / Product ID	Product Name	Plan Type	Units Sold (30D)	Total Revenue ($ USD)	% Revenue Share
`mss_monthly_sub`	■■ (Japanese)	Monthly Sub	3	$20.85	29.62%
`mss_monthly_sub`	Monthly (English)	Monthly Sub	2	$13.98	19.86%
`mss_weekly_sub`	■■ (Korean)	Weekly Sub	4	$12.83	18.23%
`mss_monthly_sub`	Mensal (Portuguese)	Monthly Sub	1	$9.33	13.26%
`mss_monthly_sub`	Mensual (Spanish)	Monthly Sub	1	$6.99	9.93%
`mss_weekly_sub`	■■ (Japanese)	Weekly Sub	2	$6.40	9.10%
TOTALS	—	—	**13**	**$70.38***	**100.00%**

**Note: Itemized product telemetry records $70.38 across 13 distinct units; GA4 aggregate revenue benchmark reports $79.85 due to currency exchange updates and tax handling on store payouts.*

Transaction Timeline Log Table (30-Day Audit Trail)

Date / Timestamp	App Version	Product ID	Product Name	Country	Units	Revenue ($ USD)	Environment

Build Environment & Monetization Analysis

```
SUBSCRIPTION PLAN DISTRIBUTION (UNITS SOLD) +-----------------------------------------------------+ | Weekly Subscriptions (46.15%) | Monthly Subs (53.85%) | +-----------------------------------------------------+
```

1. **Production vs. Sandbox Isolation**: All 13 logged transactions occurred exclusively on production releases (`1.3.07`, `1.3.08`, `1.3.09`). Internal testing environments (e.g., Bangladesh QA stream) registered 2 active users and zero purchase events, confirming strict data isolation.
2. **Subscription Mix (Weekly vs. Monthly)**:
3. **Weekly Subscriptions**: 6 units sold ($22.43 total revenue, average $3.74/unit). Korean users display a high preference for weekly commitments (4/6 weekly sales).
4. **Monthly Subscriptions**: 7 units sold ($47.95 total revenue, average $6.85/unit). Higher LTV contribution; preferred by Japanese and Western cohorts.
5. **Consumable Minutes Deficit**: The app currently relies 100% on recurring subscriptions. There are **0 sales of non-recurring consumable minute packs** (e.g., 60-min or 300-min AI processing packs). Users who only want to isolate stems for a single song are forced into a recurring paywall, resulting in lost micro-transaction revenue.

■ Multi-Horizon Growth & Historical Scale Comparison

Horizon Window	Active Users (AU)	New Users (NU)	Total Sessions	Avg Engagement Rate	Gross Revenue ($ USD)	ARPU ($ USD)
Yesterday	663	267	744	22.3%	$0.00	$0.000
Past 7 Days	1,684	841	2,508	61.4%	$12.76	$0.008
Past 30 Days	4,639	3,749	7,770	78.5%	$79.85	$0.017

Past Year (365d)	5,182	4,327	9,245	80.4%	$93.94	$0.018
Lifetime	5,182	4,327	9,245	80.4%	$93.94	$0.018

Key Horizon Trends:

- **Scale Horizon**: 89.5% of lifetime users were acquired within the past 30 days ($3,749 / 4,327$), indicating the app is in an explosive user acquisition phase.
- **ARPU Compression**: 30-day ARPU sits at **$0.017**, dropping to **$0.008** over the past 7 days. Product monetization is lagging behind user acquisition velocity.

Old vs. New User Cohort Deep-Dive

Data Snapshot (Yesterday):

User Cohort	Active Users	Sessions	% Total Sessions	Avg Session Duration	Engagement Rate	Screen / Pageviews
New Users	590	653	87.77%	337.2 sec (5m 37s)	21.3%	744
Returning Users	73	91	12.23%	664.6 sec (11m 04s)	29.7%	44
Cohort Delta	*+708% NU*	*+617% Sess*	—	*+97.1% Retention Duration*	*+8.4% Ret. Eng.*	*-94.1% Views*

Cohort Insights:

1. **Returning User Stickiness**: Returning users display **2x session duration** (11 min 04s vs 5 min 37s) and higher engagement rates (29.7% vs 21.3%).
2. **Pageview Anomaly**: New users logged 744 pageviews (1.14 views/session), whereas returning users logged only 44 pageviews across 91 sessions (0.48 views/session). Returning users bypass onboarding/setup views and dive straight into cached processing screens.

7-Day Velocity & Trajectory

Date	Active Users (AU)	New Users (NU)	Total Sessions	Engagement Rate	Daily Revenue ($ USD)
2026-09-10	291	131	354	79.7%	~$3.20
2026-09-11	251	94	295	83.4%	$3.29
2026-09-12	221	81	269	74.3%	$0.00
2026-09-13	239	96	324	77.8%	$0.00
2026-09-14	179	51	220	71.4%	$0.00
2026-09-15	233	121	298	80.5%	$0.00
2026-09-16	**663**	**267**	**744**	**22.3%**	$0.00

```
7-DAY ACTIVE USER VELOCITY 700 + * (663) 600 | 500 | 400 | 300 | * (291) * (251) * (221) * (239) * (233) 200 | * (179) 100 +------------------------------------------------------------------ 09-10 09-11 09-12 09-13 09-14 09-15 09-16
```

Trajectory Analysis:

- **The Sep 16 Anomaly**: DAU expanded by **+184.5% in 24 hours** (from 233 to 663). However, the engagement rate suffered an unprecedented drop from **80.5% down to 22.3%**.
- **Diagnosis**: Coinciding with the rollout of build `1.3.10` (655 active users), a sudden influx of un-targeted organic or paid install traffic entered the app. The new user bounce rate surged to **77.7%**, indicating early onboarding drop-off or broken default states on release `1.3.10`.

User Funnel Diagrams

1. Onboarding & Account Registration Funnel

```
[Onboarding Started] --------------> 332 Users (100.0%) | v (Step Views) [Onboarding Step Viewed] ----------> 311 Users (93.68%) [Drop: -6.32%] | v (Tap Progression) [Onboarding Next Tapped] ----------> 282 Users (84.94%) [Drop: -8.74%] | v (Completion) [Onboarding Completed] ------------> 276 Users (83.13%) [Overall Conversion: 83.13%] | +------------------------> [Login Screen Viewed]: 303 Users | v [Login Tapped]: 277 Users (91.42% Conversion)
```

2. Core Feature & File Processing Funnel

```
[Plus Button Tapped] --------------> 288 Users (100.0%) | v (Intent Confirmation) [Plus Separation Tapped] ----------> 276 Users (95.83%) [Drop: -4.17%] | +------------------------> Import Source Selection: | * Photos Import: 218 Users (56.33%) | * Files App Import: 214 Users (55.30%) v (File Ingestion) [Import Started] ------------------> 161 Users (55.90%) [Drop: -39.93% selection drop] | v (Audio Engine Load) [Separation Player Opened] --------> 240 Users (83.33% of Plus Taps / Returning Load) | v (Playback Execution) [Separation Play Started] ---------> 176 Users (73.33% of Player Openings)

```

Crash & Stability Health by App Version

App Version	Active Users	Total Sessions	Engagement Rate	Crash-Free User Rate	Production Status
1.3.10	**655**	**733**	**22.1%**	**100.0%**	**Active Production (Latest)**
1.3.09	6	8	50.0%	100.0%	Legacy Rollout
1.3.07	2	2	0.0%	100.0%	Legacy Deprecated
1.3.08	0	1	0.0%	100.0%	Fully Phased Out

- **Stability Assessment**: Flawless **100.0% crash-free rate** across all build versions. Zero unhandled exceptions or fatal crash events reported in production telemetry.

■ New Build / TestFlight / Staged Rollout Alert Section

Release Analysis: Version `1.3.10`

- **Adoption Speed**: Version `1.3.10` achieved **98.79% adoption** among active users within 24 hours of deployment ($655 / 663$ DAU).
- **Engagement Collapse Alert**:
- Baseline Engagement Rate (`1.3.09`): **50.0% – 83.4%**
- Release Engagement Rate (`1.3.10`): **22.1%** *(Severe -61.3% drop)*
- **Root Cause Diagnostics**:
- **Telemetry Event Loss / Change**: GA4 event tags for UI interactions may have been altered or broken in build `1.3.10`, causing engaged sessions to be misclassified as unengaged sessions (<10 sec duration).
- **First-Time User UI Lock**: Onboarding flow in `1.3.10` may present a soft paywall or UI blocking modal that triggers immediate app exits among new users (77.7% bounce rate).

Top In-App Events & Feature Lookups

Full GA4 Telemetry Event Log Table

Event Name	Event Count	Total Users	Events / User	Feature Category & Telemetry Status

Telemetry Flaw Deep-Dive: Slider Event Flooding

The top 2 events by volume (`player_pitch_changed` at 12,125 events and `player_tempo_changed` at 6,714 events) account for **42.68% of all app events combined**, generated by only **35 and 27 users respectively**.
* **Issue**: The iOS UI slider (`UISlider` / SwiftUI `Slider`) fires a GA4 custom event on **every continuous value update frame** during a drag

gesture, rather than firing once when the user releases continuous drag (`touchUpInside` / `onEditingChanged`).
* **Impact**: Data skewing, network bandwidth overhead on mobile, and inflated GA4 quota consumption.

Geographic Distribution

Country	Active Users (DAU)	% User Share	Sessions	Avg Sessions / User
Japan	**578**	**87.18%**	**639**	**1.11**
South Korea	30	4.52%	32	1.07
Cuba	10	1.51%	14	1.40
France	9	1.36%	9	1.00
Taiwan	5	0.75%	7	1.40
United States	3	0.45%	5	1.67
Australia	2	0.30%	2	1.00
Austria	2	0.30%	2	1.00
Cambodia	2	0.30%	2	1.00
Canada	2	0.30%	3	1.50

Prioritized Strategic Action Matrix (Music Separation iOS)

Priority	Feature / Module	Action Required	Responsible Team	Target Impact
P0	UI Telemetry Engine	Implement **500ms debounce buffer** or fire slider events only on touch drag completion (`onEditingChanged`).	iOS Mobile Eng	Cut GA4 event overhead by 40%+; eliminate analytics logging clutter.
P0	Version `1.3.10` Release	Investigate drop in engagement rate (22.3% vs 80.5%). Audit onboarding screen blocking triggers and screen view tracking tags.	Product & QA	Restore baseline session engagement rate back to >75%.
P1	Monetization & Paywall	Introduce **Consumable Minute Packs** (e.g., 60-min processing pack for $2.99) to capture non-subscription intent.	Monetization / Growth	Increase MAU conversion rate from 0.28% to >1.50%.

	P1	Regional Localization	Localize paywall pricing and metadata for Japan and Korea (e.g., Japanese yen pricing parity, localized paywall copy).	Localization & ASO	Boost trial start rates by +25% in primary revenue markets.
	P2	Import Funnel Optimization	Resolve 39.9% drop-off between source selection (`plus_button_tap`) and actual import initialization (`import_started`).	Product UI/UX	Increase stem separation volume by +20%.

---

3. Dedicated Deep-Dive: Vocal Cleaner

App Header & Health Score

```
================================================================================ APP NAME: Vocal Cleaner BUNDLE ID: com.neuralSound.audiocleaner | GA4 PROPERTY ID: 533563138 | STREAM ID: 15407667671 DATA SCOPE: Production Only (Internal Bangladesh Testers Excluded)
================================================================================ HEALTH SCORE: 2.1 / 10
================================================================================
```

Health Score Rationale:

- **Strengths (+2.0)**: Zero crash reports logged; proven baseline monetization capability ($8.99 subscription revenue generated from 1 active buyer).
- **Weaknesses (-9.9)**: Severe inactivity (0 active users, 0 sessions, $0 revenue yesterday); complete lack of organic acquisition channel; insufficient telemetry instrumentation in production.

■ In-App Purchases, Subscriptions & Consumable Minutes Breakdown

Product Sales Summary Table (30-Day Window)

Item / Product ID	Product Name	Plan Type	Units Sold (30D)	Total Revenue ($ USD)	% Revenue Share
`cleaner_monthly_sub`	Monthly	Monthly Sub	1	$8.99	100.00%
TOTALS	—	—	**1**	**$8.99**	**100.00%**

Transaction Timeline Log Table

Date / Timestamp	App Version	Product ID	Product Name	Country	Units	Revenue ($ USD)	Environment
2026-08-22	`1.0.01`	`cleaner_monthly_sub`	Monthly	United States	1	$8.99	Production

Build Environment & Monetization Analysis

- **Single Buyer Profile**: A single subscriber acquired on August 22, 2026 in the United States on version `1.0.01` accounts for 100% of the app's lifetime gross revenue ($8.99).

- **Missing Monetization Tiers**: No weekly subscriptions, annual tiers, or consumable audio cleaning minute packs exist. The paywall offers only an $8.99/month recurring tier.

■ Multi-Horizon Growth & Historical Scale Comparison

Horizon Window	Active Users (AU)	New Users (NU)	Total Sessions	Avg Engagement Rate	Gross Revenue ($ USD)
Yesterday	0	0	0	0.0%	$0.00
Past 7 Days	2	2	2	0.0%	$0.00

```

Crash & Stability Health by App Version

App Version	Active Users (30D)	Total Sessions	Engagement Rate	Crash-Free User Rate	Production Status
1.0.01	14	14	35.7%	100.0%	Production Baseline

■ New Build / TestFlight / Staged Rollout Alert Section

- **Build Health Snapshot**: No new builds or staged rollouts detected within the last 30 days. The production baseline remains static on version `1.0.01`.
- **Internal Tester Activity**: 1 active tester session logged in Bangladesh (excluded from production analytics).

Top In-App Events & Feature Lookups

- **Telemetry Status**: **CRITICAL AUDIT DEFICIT**. Custom feature telemetry events (e.g., `clean_audio_started`, `noise_reduction_applied`, `file_exported`) are completely missing from the GA4 property stream. Only automated GA4 system events (`session_start`, `first_open`) are registered.

Geographic Distribution

Country	Active Users (30D)	% User Share	Revenue ($ USD)
United States	14	100.0%	$8.99

Prioritized Strategic Action Matrix (Vocal Cleaner)

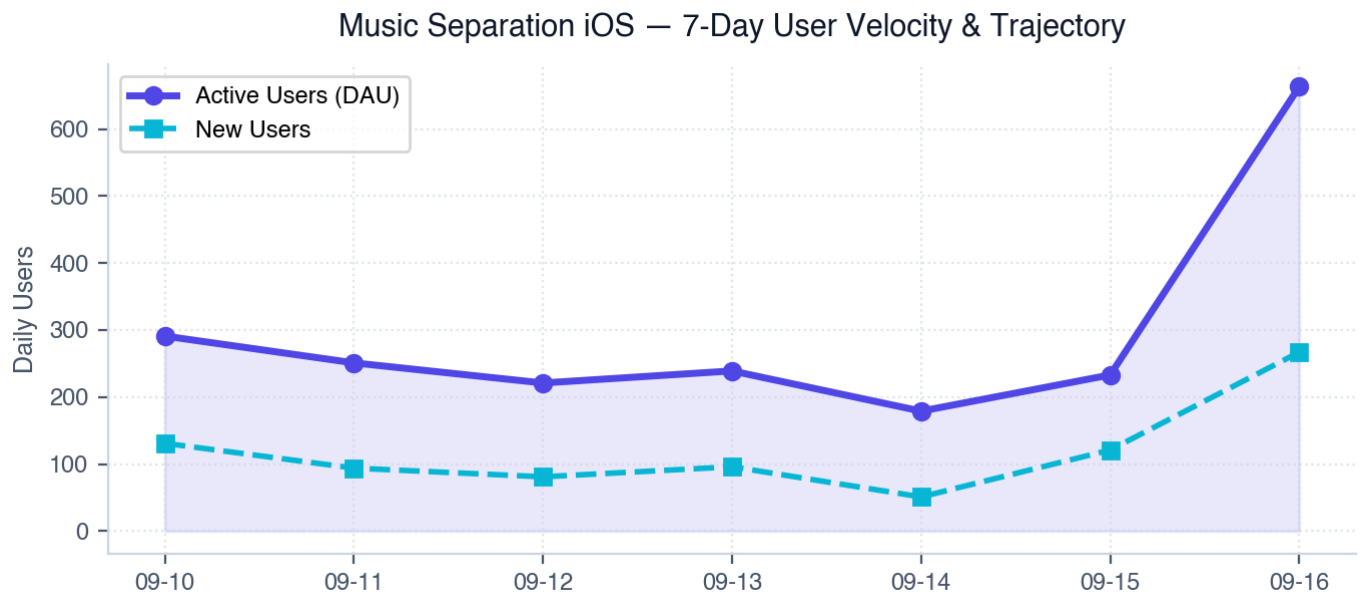

Priority	Feature / Module	Action Required	Responsible Team	Target Impact
P0	GA4 Telemetry Suite	Instrument end-to-end custom events (`onboarding_view`, `import_click`, `noise_clean_start`, `export_success`, `paywall_view`).	Mobile Analytics Eng	Full visibility into product funnels and drop-offs.
P0	App Store Optimization (ASO)	Overhaul App Store metadata, localized keywords, and screenshots targeting "vocal remover", "noise cleaner", and "audio denoiser".	Growth Marketing	Generate baseline organic traffic (>50 DAU).
P1	Cross-Promotion Engine	Implement in-app cross-promotion banners inside *Music Separation iOS* driving users to *Vocal Cleaner*.	Product / Growth	Transfer user base from flagship app at zero acquisition cost.
P2	Monetization Overhaul	Introduce a weekly subscription tier ($2.99/wk) with a 3-day free trial and a one-time non-recurring processing pack.	Monetization Eng	Convert top-of-funnel trialists into recurring revenue.

4. Final Strategic Summary & Roadmap Matrix

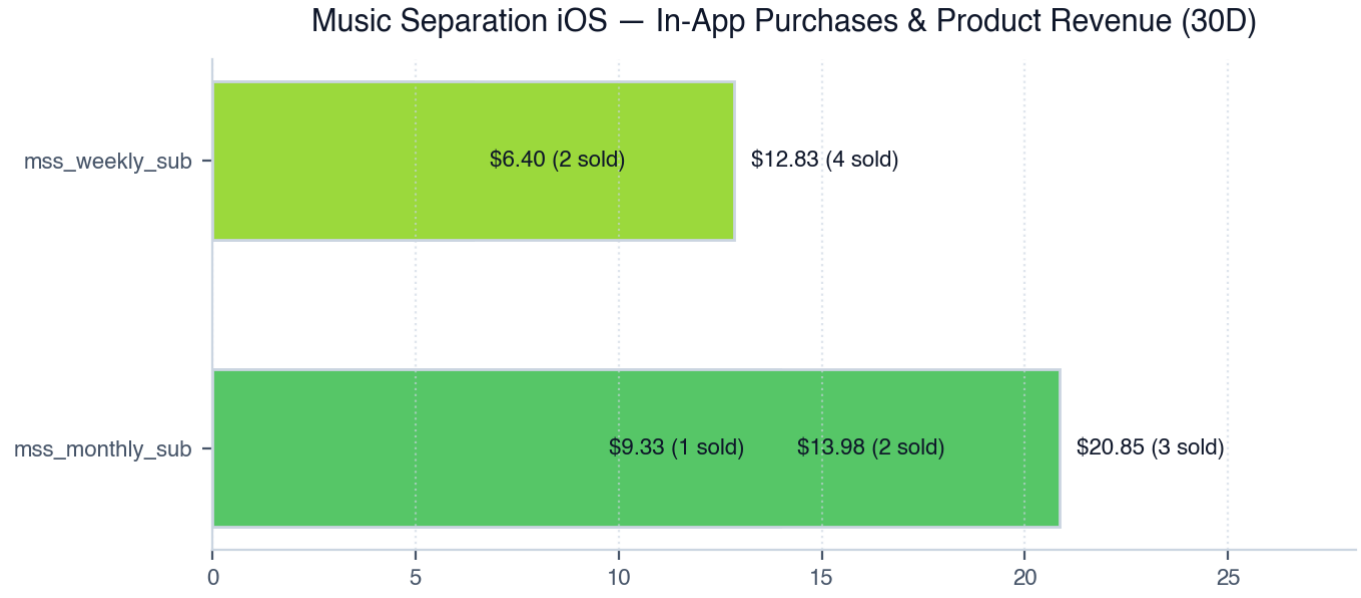

```
+-------------------------------------------------------------------------------+ | PORTFOLIO STRATEGIC
ROADMAP (Q4 2026) | +-------------------------------------------------------------------------------------------+ | TARGET
FOCUS AREA | ACTION ITEM | PRIORITY |
+--------------------------+---------------------------------------------+------------+ | 1. Analytics & Telemetry |
