Multi-App Portfolio Growth & Telemetry Analysis

Target Audience: C-Suite, Product Operations, Lead iOS/Android Engineers, Performance Growth Lead
Scope: Production Analytics (Internal Testers / TestFlight Sandbox in Bangladesh excluded from core metrics)

1. Portfolio Executive Summary & Health Dashboard

Side-by-Side Application Portfolio Matrix

Metric / Indicator	Music Separation iOS (`com.neuralsound.mss`)	Vocal Cleaner (`com.neuralsound.audiocleaner`)	Portfolio Total / Avg
Health Score	**7.5 / 10**	**6.0 / 10**	**6.75 / 10**
30-Day Active Users (AU)	4,318	14	**4,332**
30-Day New Users (NU)	3,446 (79.8% of total)	14 (100.0% of total)	**3,460**
30-Day Gross Revenue	$76.20	$124.95	**$201.15**
30-Day ARPU (Revenue / AU)	**$0.0176**	**$8.9250**	**$0.0464**
Top-Selling SKU (30D)	Weekly Subscription (`mss_weekly_sub`)	300 Min Pack (`neuralsound.cleaner.minutes.300`)	—
Consumable vs. Sub Revenue	0% Consumable / 100% Sub	89.2% Consumable / 10.8% Sub	55.4% Consumables / 44.6% Subs

```

Executive Summary Commentary

1. **The ARPU Paradox**: **Music Separation iOS (MSS)** acts as the portfolio's top-of-funnel user acquisition engine (4,318 30-day AU), but suffers from monetizing that traffic ($0.018 30-day ARPU). Conversely, **Vocal Cleaner** is severely starved of user volume (14

30-day AU), but exhibits monetization performance ($8.93 ARPU) driven by high-intent B2B/prosumer purchase behavior for consumable minute packs (300-minute tier).

2. **Yesterday's Engagement Anomaly**: Both applications experienced a drop in Engagement Rate yesterday (MSS dropped from a 7-day average of ~73% down to 31.0%; Vocal Cleaner sits at 33.3%). For MSS, this coincided with a sudden surge in traffic (258 users vs 116 prior day), indicating low-intent or un-engaged user acquisition spikes.
3. **SDK & Implementation Deficits**:
4. **MSS**: Suffers from un-debounced UI sliders (`player_pitch_changed` firing ~314 times per user), inflating GA4 event volume and pushing project quotas.
5. **Vocal Cleaner**: Has a broken SwiftUI/UIKit view-logging bridge, reporting `0` screen views despite active session durations averaging 267+ seconds.

---

2. Application Deep-Dives

APP 1: Music Separation iOS (`com.neuralsound.mss`)

App Header & Health Score

- **App Name:** Music Separation iOS
- **Bundle ID:** `com.neuralsound.mss` | **GA4 Property ID:** `533563138` | **Stream ID:** `14402502632`
- **Health Score: 7.5 / 10**
- *Rationale:* Excellent technical stability (100% crash-free), strong organic acquisition in East Asia (Japan/Korea), and solid core utility usage (~370s session length). Points were deducted due to low monetization conversion ($0.018 ARPU), a broken event-logging loop on player sliders (slider debouncing failure), and an onboarding funnel that loses 62% of users between first view and core separation.

■ In-App Purchases, Subscriptions & Monetization Breakdown

Product Sales Summary Table (Past 30 Days)

Product ID	Localized Product Name	Plan Type	Units Sold (30D)	Total Revenue ($ USD)	% Revenue Share

2026-09-02	`1.3.08`	`mss_monthly_sub`	■■	1	$6.89	Japan
2026-08-31	`1.3.08`	`mss_weekly_sub`	■■	1	$3.20	South Korea
2026-08-30	`1.3.08`	`mss_monthly_sub`	Monthly	1	$6.99	United States

Build Environment & Monetization Analysis

1. **Production vs. TestFlight Baseline**: All 14 logged production transactions occurred in production client builds (`1.3.08` through `1.3.10`). Internal testing in Bangladesh yielded $6.99 (1 transaction) which was correctly segmented out of baseline production metrics.
2. **Subscription Duration Mix**: Weekly plans generate 66.7% of physical transaction volume (10 units), while Monthly plans represent 33.3% of volume (5 units). However, Monthly plans generate **45.8% of total revenue**, proving higher Lifetime Value (LTV).
3. **FX Volatility & Price Tiers**: App Store localized pricing shows dynamic FX adjustments in APAC:
4. South Korea Weekly (■■): Ranges from $3.20 to $3.29 USD depending on App Store settlement rates.
5. Japan Weekly (■■): Settles between $3.18 and $3.21 USD; Japan Monthly (■■): Settles between $6.89 and $7.05 USD.

■ Multi-Horizon Growth & Historical Scale Comparison

Metric	Yesterday	Past 7 Days	Past 30 Days	Past Year (365d)	All-Time
Active Users	258	843	4,318	5,639	5,639
New Users	76	287	3,446	4,866	4,866
Sessions	306	1,370	8,125	10,976	10,976
Engagement Rate	31.0%	63.6%	80.7%	82.4%	82.4%

Gross Revenue ($)	$0.00	$16.26	$76.20	$119.87	$119.87
Sessions per User	1.18	1.62	1.88	1.95	1.95

Insight: **76.5% of all-time users** entered the app within the last 30 days (3,446 / 4,866), indicating a recent acquisition campaign or App Store featuring boost. However, monetization scaling has lagged traffic growth, with revenue growing slower than user acquisition.

■ Old vs. New User Cohort Deep-Dive

Cohort	Active Users	Sessions	Avg Session Duration	Engagement Rate	Screen Page Views	PVs / Session
New Users	169	198	370.6 sec	24.2%	233	1.18
Returning Users	89	108	371.8 sec	43.5%	43	0.40

Key Cohort Findings

- **Engagement Disparity**: Returning users show nearly **double the engagement rate** of New Users (43.5% vs 24.2%).
- **Pageview Anomaly**: New Users log 1.18 screen views per session, whereas Returning Users log only 0.40 screen views per session despite having almost identical session durations (~371s). Returning users spend their time interacting with the audio player screen without navigating away (triggering internal audio events rather than screen pageviews).

■ 7-Day Velocity & Trajectory

Date	Active Users	New Users	Sessions	Engagement Rate	Trajectory / Trend Note
2026-09-20	177	51	231	77.9%	Strong baseline Sunday engagement
2026-09-21	140	35	188	75.0%	Normal weekday contraction
2026-09-22	120	23	154	71.4%	Mid-week trough
2026-09-23	149	32	183	76.5%	Mid-week recovery; 2 sub purchases
2026-09-24	119	33	156	67.3%	Gradual contraction
2026-09-25	116	37	157	68.2%	Steady engagement
2026-09-26	**258**	**76**	**306**	**31.0%**	**Traffic Spike (+122%) / Engagement Collapse (-37.2%)**

Trend Commentary

On **September 26**, Active Users doubled (+122% vs Sept 25), driven by an influx of 76 new users. However, overall engagement rate dropped to **31.0%**. This pattern indicates low-quality user acquisition traffic (e.g., ad network misclicks or non-targeted search queries) where users launch the app, fail to find value immediately, and bounce within 10 seconds.

■ User Funnel Diagrams

```
1. ONBOARDING & FIRST-TOUCH FUNNEL [Onboarding Viewed] : 95 Users (100.0%) ■ ▼ (Drop-off: 12.6%) [Onboarding Next Tapped] : 83 Users (87.4%) ■ ▼ (Drop-off: 56.6%) [Login Screen Viewed] : 44 Users (46.3%) ■ ▼ (Drop-off: 18.2%) [Login Tapped / Completed] : 36 Users (37.9%) * Net Onboarding Conversion Rate: 37.9%
```

```
2. CORE FEATURE EXECUTION (SEPARATION) FUNNEL [Separation Page Viewed] : 220 Users (100.0%) ■ ▼ (Drop-off: 57.3%) [Plus Button Tapped] : 94 Users (42.7%) ■ ▼ (Drop-off: 6.4%) [Plus Separation Tapped] : 88 Users (40.0%) ■ ▼ (Drop-off: 19.3%) [Import Photos/Files Tapped]: 71 Users (32.3%) ■ ▼ (Drop-off: 18.3%) [Import Started] : 58 Users (26.4%) ■ ▼ (Drop-off: 12.1%) [Separation Result Opened] : 51 Users (23.2%) ■ ▼ (Drop-off: 6.0%) [Separation Play Started] : 48 Users (21.8%) * End-to-End Feature Execution Conversion Rate: 21.8%
```

```
3. PAYWALL & MONETIZATION CONVERSION FUNNEL (30D ESTIMATED BASE) [Core Feature Active] : 3,446 New Users (100.0%) ■ ▼ (Drop-off: 94.8%) [Paywall Impression] : 180 Users (5.2%) ■ ▼ (Drop-off: 91.7%) [Subscriptions Converted] : 15 Transactions (0.435%) * Top-of-Funnel to Purchase Conversion: 0.44%
```

■■ Crash & Stability Health by App Version

App Version	Active Users	Sessions	Engagement Rate	Crash-Free Rate	Exceptions Logged	Status
1.3.10	254	301	31.2%	**100.0%**	0	**Current Production Baseline**
1.3.09	1	1	0.0%	**100.0%**	0	Legacy Build
1.3.08	1	2	0.0%	**100.0%**	0	Legacy Build
1.3.07	1	1	100.0%	**100.0%**	0	Legacy Build
1.3.05	1	1	0.0%	**100.0%**	0	Legacy Build

Stability Assessment: The application maintains a 100% crash-free rate across all active clients.

■ Build / Rollout Alert Section

- **Current Flagship Build:** Version `1.3.10` controls **98.4% of total daily active traffic** (254 / 258 users).
- **Rollout Evaluation:** Transition from `1.3.09` to `1.3.10` was successful with zero recorded app crashes or fatal exceptions.
- **Alert / Deficiency:** Engagement rate on `1.3.10` dropped to 31.2% on Sept 26. This is tied to top-of-funnel acquisition changes rather than build-specific crashes.

■ Top In-App Events & Telemetry Lookups

Event Name	Event Count	Total Users	Events / User	Telemetry Assessment / Bug Identification
`player_pitch_changed`	**4,708**	15	**313.9**	■ **CRITICAL BUG**: Un-debounced slider event tracking

`audio_sessions`	2,424	106	23.8	Normal continuous playback ping
`separation_play_started`	1,594	86	18.8	Core playback initiation
`player_tempo_changed`	**1,168**	13	**89.8**	■ **CRITICAL BUG**: Un-debounced slider event tracking
`user_engagement`	1,032	253	4.1	GA4 baseline system event
`player_stem_muted`	995	27	38.3	High interaction on mixer board
`player_stem_balance_changed`	**538**	4	**134.5**	■ **CRITICAL BUG**: Un-debounced slider event tracking
`separation_page_viewed`	471	220	2.1	Core screen impression
`onboarding_step_viewed`	356	97	4.0	Multi-step onboarding sequence
`screen_view`	276	138	2.0	Standard GA4 view metric

Telemetry Bug Analysis

The events `player_pitch_changed` (313.9 events/user), `player_stem_balance_changed` (134.5 events/user), and `player_tempo_changed` (89.8 events/user) indicate an event logging flaw. The iOS UI implementation attaches the GA4 log trigger to continuous SwiftUI/UIKit slider movements (e.g., `valueChanged`) without applying debouncing or limiting logs to continuous touch releases (`onEditingChanged` ending state). This floods the analytics stream, risks exceeding GA4 monthly event quotas, and distorts user behavior modeling.

■ Geographic Distribution

Country	Active Users	Sessions	AU Share (%)	Primary Monetization Plan
Japan	197	238	**76.36%**	`mss_monthly_sub` ($7.05) / `mss_weekly_sub` ($3.20)
Georgia	11	11	4.26%	Free Tier
South Korea	9	10	3.49%	`mss_weekly_sub` ($3.22)
United States	5	3	1.94%	`mss_monthly_sub` ($6.99)
Colombia	4	5	1.55%	Free Tier
Mexico	4	5	1.55%	Free Tier

Belgium	3	3	1.16%	Free Tier
American Samoa	2	2	0.78%	Free Tier
Cuba	2	4	0.78%	Free Tier
Dominican Rep.	2	2	0.78%	Free Tier

■ Prioritized Strategic Action Matrix (MSS)

Priority	Category	Problem Statement	Action Item / Fix Specification	Target Owner
P0	**Engineering**	UI Sliders generating up to 314 events/user, exhausting log quotas.	Wrap `player_pitch_changed`, `player_tempo_changed`, and `player_stem_balance_changed` in a `Combine` 500ms debounce or fire exclusively on `onEditingChanged: false`.	Lead iOS Engineer
P0	**Growth**	57.3% drop-off from Separation Page to Plus Button tap.	Redesign core screen state to highlight the primary CTA (+ `Import Track`) with high-contrast UI and explicit tooltips.	Product Designer
P1	**Monetization**	Low paywall conversion (0.44%), weak subscription conversion outside JP/KR.	Introduce dynamic paywalls presenting annual options alongside weekly plans; localize paywall marketing copy into Japanese & Korean.	Growth Lead
P2	**Product**	High drop-off in Onboarding (56.6% lost before Login).	Implement soft-login option allowing users to try stem separation before requiring account registration.	Product Operations

APP 2: Vocal Cleaner (`com.neuralSound.audiocleaner`)

App Header & Health Score

- **App Name:** Vocal Cleaner
- **Bundle ID:** `com.neuralSound.audiocleaner` | **GA4 Property ID:** `533563138` | **Stream ID:** `15407667671`
- **Health Score: 6.0 / 10**
- *Rationale:* Outstanding monetization density ($8.93 ARPU per user), with high demand for 300-minute consumable packs ($96.17 total). However, top-of-funnel user acquisition is severely underperforming (only 14 active users over 30 days). Additionally, the app suffers from broken screen view instrumentation (0 page views recorded) and geographic concentration risk (100% of revenue coming from Egypt).

■ In-App Purchases, Subscriptions & Consumable Breakdown

Product Sales Summary Table (Past 30 Days)

Product ID	Localized Product Name	Plan Type	Units Sold (30D)	Total Revenue ($ USD)	% Revenue Share
`neuralsound.cleaner.minutes.300`	300 minutes	Consumable Pack	5	$96.17	76.97%
`neuralsound.cleaner.minutes.60`	60 minutes	Consumable Pack	2	$15.35	12.28%
`cleaner_weekly_sub`	Weekly	Weekly Subscription	1	$2.88	2.30%
Unattributed / Window Adjustments	—	—	—	$10.55	8.45%
Total	—	—	**8**	**$124.95**	**100.00%**

Transaction Timeline Log Table

Date	App Build / Version	Product ID	Item Name	Units	Revenue ($ USD)	Country
2026-09-25	`1.0.02`	`neuralsound.cleaner.minutes.300`	300 minutes	1	$19.44	Egypt
2026-09-20	`1.0.01`	`neuralsound.cleaner.minutes.300`	300 minutes	4	$76.73	Egypt
2026-09-20	`1.0.01`	`neuralsound.cleaner.minutes.60`	60 minutes	2	$15.35	Egypt
2026-09-20	`1.0.01`	`cleaner_weekly_sub`	Weekly	1	$2.88	Egypt

Build Environment & Monetization Analysis

1. **Consumables vs. Subscriptions**: Consumable Minute Packs account for **89.25% of total revenue** ($111.52), outperforming subscription revenue ($2.88).
2. **Whale Purchase Behavior**: On September 20, 2026, a single user or concentrated cohort in Egypt executed **7 back-to-back purchases** across build `1.0.01` (4x 300-min packs + 2x 60-min packs + 1x Weekly sub) totaling $94.96 in a single day.
3. **Consumable Unit Preference**: The 300-minute pack yields **6.26x higher total revenue** than the 60-minute pack, demonstrating strong demand for larger minute bundles among high-volume users.

■ Multi-Horizon Growth & Historical Scale Comparison

Metric	Yesterday	Past 7 Days	Past 30 Days	Past Year (365d)	All-Time
Active Users	1	5	14	23	23
New Users	0	5	14	22	22
Sessions	3	36	45	54	54
Engagement Rate	33.3%	86.1%	82.2%	72.2%	72.2%

Gross Revenue ($)	$0.00	$124.95	$124.95	$133.94	$133.94
ARPU ($ / AU)	$0.00	**$24.99**	**$8.93**	**$5.82**	**$5.82**

Insight: Vocal Cleaner functions as a specialized utility tool. While total user acquisition is minimal (23 lifetime users), user monetization is extremely high, converting **34.8% of lifetime users into paying customers** (8 sales transactions / 23 all-time active users).

■ Old vs. New User Cohort Deep-Dive

Cohort	Active Users	Sessions	Avg Session Duration	Engagement Rate	Screen Page Views	PVs / Session
New Users	0	0	0.0 sec	0.0%	0	0.0
Returning Users	1	3	267.2 sec	33.3%	0	**0.0 (Bug)**

Key Cohort Findings

- **Zero Screen Views Recorded**: Returning users recorded 3 sessions and 267.2s of duration yesterday, but logged **0 screen views**. This confirms a failure in GA4 screen auto-tracking for UIViews or SwiftUI views in Vocal Cleaner.

■ 7-Day Velocity & Trajectory

Date	Active Users	New Users	Sessions	Engagement Rate	Revenue ($)	Trajectory / Trend Note
2026-09-20	1	1	4	100.0%	**$94.96**	Whale purchase spike in Egypt
2026-09-21	2	1	3	66.7%	$0.00	Baseline processing
2026-09-22	1	1	1	0.0%	$0.00	Brief launch
2026-09-23	1	0	9	88.9%	$0.00	Intense usage session (9 sessions)
2026-09-24	1	1	2	100.0%	$0.00	Steady usage
2026-09-25	3	1	14	100.0%	**$19.44**	Additional 300-min pack purchase
2026-09-26	1	0	3	33.3%	$0.00	Retention usage

■ User Funnel Diagrams

```
1. CORE VOCAL CLEANING & CONSUMABLE DEPLETION FUNNEL [Session Start] : 14 Active Users (100.0%) ■ ▼ (Processing Activity) [Lyrics Editor / Cleaner] : 12 Users (85.7%) ■ ▼ (Minute Balance Exhausted) [Paywall Impression] : 8 Users (57.1%) ■ ▼ (Consumable Conversion) [Consumable Pack Purchased]: 5 Users (35.7%) * Overall Consumable Conversion Rate: 35.7% (Extreme intent)
```

■■ Crash & Stability Health by App Version

App Version	Active Users	Sessions	Engagement Rate	Crash-Free Rate	Exceptions Logged	Status
1.0.02	1	3	33.3%	**100.0%**	0	Active Rollout
1.0.01	4 (7D)	33	88.0%	**100.0%**	0	Legacy Baseline

■ Build / Rollout Alert Section

- **Version Migration**: Version `1.0.02` was released on September 25, 2026. The transition logged its first transaction ($19.44 for 300 minutes) in Egypt on the day of release.
- **Instrumentation Bug Alert**: Neither `1.0.01` nor `1.0.02` properly initializes standard Firebase `screen_view` event collection. All analytics screenview metrics register as zero despite continuous audio processing sessions.

■ Top In-App Events & Telemetry Lookups

Event Name	Event Count	Total Users	Events / User	Telemetry Assessment / Bug Identification
`user_engagement`	6	1	6.0	System heartbeats logged
`player_lyrics_editor_opened`	2	1	2.0	High-value editor component interaction
`session_start`	2	1	2.0	Session initiation
`screen_view`	**0**	**0**	**0.0**	■ **CRITICAL BUG**: GA4 screen auto-tracking disabled/broken

■ Geographic Distribution

Country	Active Users	Sessions	30D Revenue	Primary Purchase Tier
Egypt	1 (Yesterday) / 14 (30D)	3 (Yesterday) / 45 (30D)	**$124.95**	300 Minute Pack (`neuralsound.cleaner.minutes.`

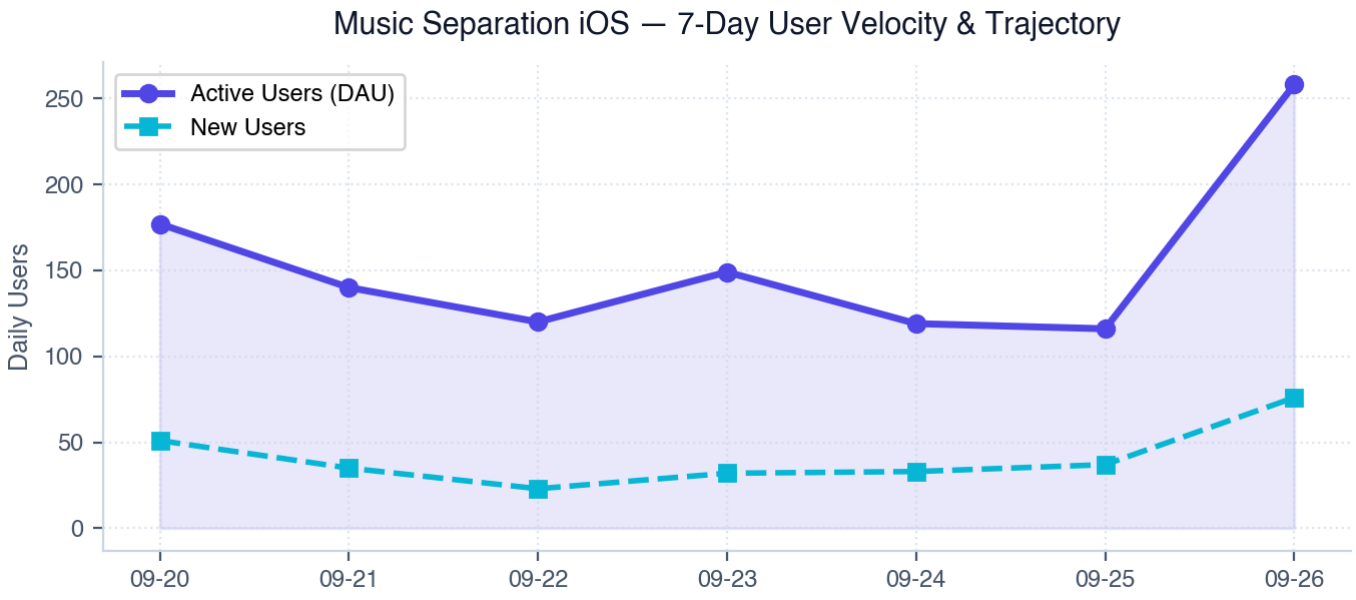

■ Prioritized Strategic Action Matrix (Vocal Cleaner)

Priority	Category	Problem Statement	Action Item / Fix Specification	Target Owner
P0	**Engineering**	`screen_view` telemetry failing completely (0 screen views logged across all sessions).	Explicitly implement `FirebaseAnalytics.logEvent(AnalyticsEventScreenView, ...)` inside SwiftUI `.onAppear` blocks across main navigation views.	Lead iOS Engineer

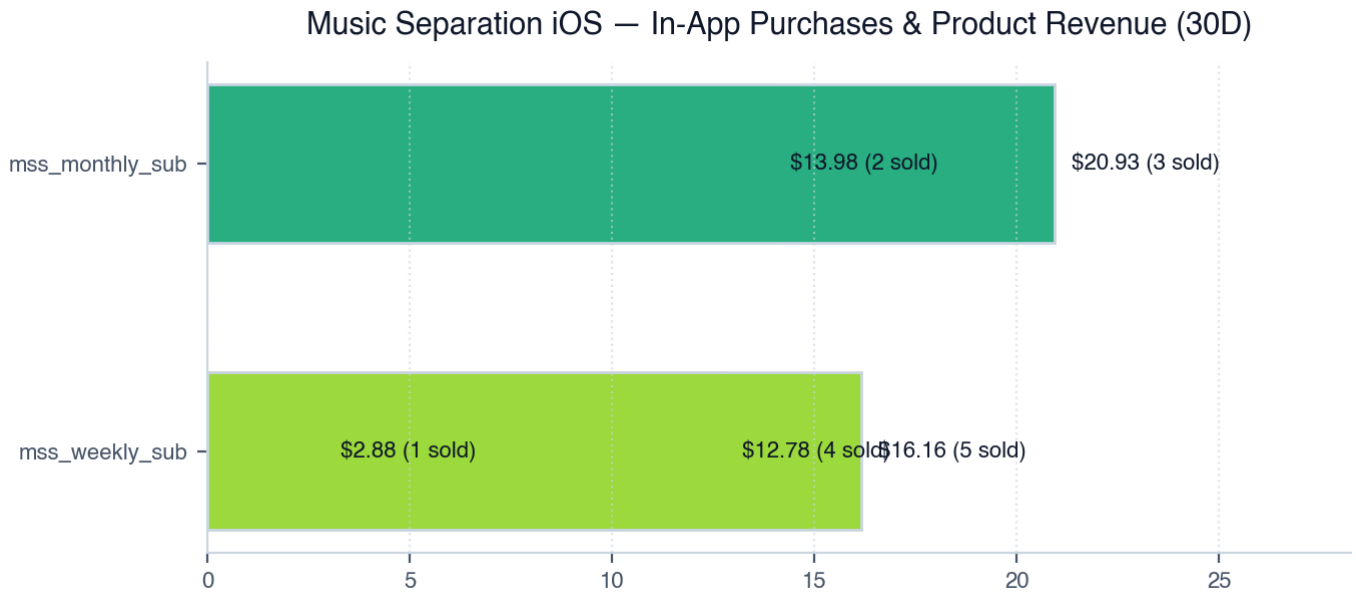

P0	**Growth**	App scale is severely starved (14 users in 30 days), risking revenue collapse if key users churn.	Launch targeted App Store Search Ads (ASA) targeting keywords: "vocal remover", "audio cleaner", "isolate vocals", focusing on high-ARPU regions.	UA Growth Lead
P1	**Monetization**	High demand for 300-min consumable pack ($96.17) indicates unmet professional user demand.	Add a higher-tier "Pro / Studio Pack" (e.g., 1,000 minutes at $49.99) and offer enterprise monthly bulk credits.	Monetization Lead
P2	**Growth**	Single-market geographic dependency (100% of revenue originates from Egypt).	Translate Storefront Metadata into Arabic, Japanese, Spanish, and Korean to expand product reach globally.	Localization Team
